GENERAL SERVICE REPORT

Customer:	Tassal DeCosti	**Date:**	29th October
Site Address:	29 Bachell ave Lidcombe	**Site Contact:**	Darryn.Hicks@tassal.com.au
		Phone:	
Customer PO		**Internal Job :**	5789

Subject: Speed trials Line 3 Trave 1200

Equipment Type:	Serial Number:	Customer Line # (if applicable):
Trave 1000	00927	Skin line
Trave 1000	11377	High care MAP
Trave 1200	A16A-11326	Map
Trave 1000	12479	Tropica MAP

Equipment condition:

Work Performed:

Wednesday 29th

Speed trials on 9x5 tool

- *The normal recipe was loaded (Fast 9x5) so we could monitor the line and see where we can improve.*
- *The line was running at 77ppm and we slowing started to increase the speed to 80ppm*
- *The line can achieve 80ppm but we are limited with trays not stable during the movement and this is caused by contamination under the trays and wet belts.*
- *1st Solution is to install an air knife under section of the belt to try keep the belt free off contamination and dry.*
- *2nd Solution is to replace the spacer belt with a more sticker type, and will need to make sure they trays slide during pusher arm movement.*
- *80ppm recipe was created and ready for solution one and two for testing.*

Speed on 9x7 tool

- *The normal recipe was loaded (Fast 9x7) so we could monitor the line*
- *They were running at 60ppm without an issue*
- *To create a faster recipe we need to do a few things and can't do while they running.*
- *1st solution is to increase belt speeds to create a bigger tray gap, this needs to be proven.*
- *2nd solution is to Install a second vacuum pump to increase the vacuum cycle which allows faster tool cycle*
