Subject: Line 18 major service

Equipment Type:	Serial Number:	Customer Line # (if applicable):
Trave 590 XL	A18A-11947	Line 18

Equipment condition:

Work Performed:

- Followed production after the major service done on the last two days
- Before production we have concentrated our resources to get the lubrication system working again. The grease pump was blocked by old thick grease which clogged up all the unit. The tank was fully cleaned and fresh new grease introduced.
- We also individually greased every single channel to guarantee fresh new grease lubricates the new bushing and new bearings installed.

- Managed to start production around 7 am and we had to fine-tune some parameters in the recipes and the some adjustment was done on the infeed pacer system tighter with the mince loading section.

GENERAL SERVICE REPORT

- Everything was operating smoothly when we left site at 112 piece per minute and the recipe loaded in the machine was the T05.

- During the production follow up we also organised the new plates to be installed on the DOT Medium tool for line 3 to be capable receiving the new 20 mm trays.
