Subject: Test ne Film on the Dharfresh machine. (VST280 150um)			

Equipment Type:	**Serial Number:**	**Customer Line # (if applicable):**
Trave 340 Dharfresh		Line 1

Equipment condition:

Good

Work Performed:

Daniel requested me onsite as they want to test/commission new film on the machine.

Arrived onsite and created a new recipe for the new film. Due to the 150um film and the fact that the machine is not equip with pre heaters on the film, I had to introduce a extra process into the cycle. The extra process entails that the film/shuttle will stop below the tool and heat up the film by blow hot air onto it before it pick up the film from the shuttle.This sligtly reduces the speed of the machine. I succesfully process with this film and noted that the packs are very hard to open.

I reported to Daniel and advised production have a small production run with this film to see if they are satisfied.
