Trave 590	A17A-11614	Line 4
Platformer	A17A-11614	Line 4

Equipment condition:

Work Performed:

Thursday 13th

- *Support production on start-up with new 9x8 sealbars*
- *The line started with a few issue trying to get the film to stick onto the sealbars*
- *Battled to get the film to work with all the changes to settings*
- *Once we replaced the roll of film I started to see an improvement*
- *Made the changes so production could start.*
- *Watched production for a while to make sure all runs well, my main concern was the forming in the dome.*
- *The film cutting area on the mobile clamp is too long causes problems on the fixed clamp, and to overcome this the open delay has been increased to prevent film folding over during transfer.*
- *Product placement is too large for trays size causing reworks.*
- *I also noticed heating on preheats not stable, plug or PT100 needs inspecting.*
