GENERAL SERVICE REPORT

Customer:	Dardanup Butchering Company.	**Date:**	14/04/2025
Site Address:		**Site Contact:**	Steve/Daniel
		Phone:	
Customer PO #:		**Internal Job #:**	SR5360
Subject: Fine tune Dharfresh machine after new vacuum pump installation			

Equipment Type:	Serial Number:	Customer Line # (if applicable):
Trave 340 Dharfresh		Line 1

Equipment condition:

Good

Work Performed:

Arrived onsite and I setup the machine for the 100um film. I had to introduce a big dome formation delay to prevent the film from breaking. Also, I had to throttle the top vacuum valve(Big valve) in order not to break the film. DBC currently has 30mm deep domes and although the recipe is functioning at the moment, I feel that we are border line forming 100um film inside these domes. DBC should test and run a couple of production runs and advise if the cycle time and rejects are acceptable. While I was monitoring the line, it was processing good.

I advise to test the 120um film to see if we can achieve a better result (Cycle time and bone products)

STATUS		
Machine Tested?	Yes☒	No☐
Comments: **Recommending testing 120um film**		
Revisit Required?	Yes☐	No☒
