| Platformer | A17A-11614 | Line 4 |

**Equipment condition:**

Trials on Platformer

**Work Performed:**

Platformer

Running Plantic film trials on Platformer of which we had a few problems

- The pick and place was not picking up the film sheets from distance belt.
- We found the sensor on the pick and place carriage was failing, we had to remove the complete plate to investigate and found the mounting pin was damaged; this had to be drilled and retaped.

- Replaced the damaged sensor, which we found loose, and touching the pin that damaged both sensor and pin.
- The vacuum for pick and place was tested and found to be working okay.
- The film sheets had too much of a curve making it difficult for vacuum cups to hold on too and leaked vacuum causing the sheets to drop or not hold.
