# GENERAL SERVICE REPORT

| | | | |
|---|---|---|---|
| **Customer:** | Coles ROAA | **Date:** | 18th and 19th July |
| **Site Address:** | 54 Templar Rd, Erskine Park NSW 2759 | **Site Contact:** | Suvir Salins |
| | | **Phone:** | 0410 556 153 |
| **Customer PO #:** | | **Internal Job #:** | 3998 |

**Subject:** Trials with pre-made trays 9x8

| Equipment Type: | Serial Number: | Customer Line # (if applicable): |
|---|---|---|
| Trave 590 | A17A-11614 | Line 4 |
| Platformer | A17A-11614 | Line 4 |

**Equipment condition:**

**Work Performed:**

**Tuesday 18th**

- *Created a new recipe for Plantec 9x8 pre-made trays.*
- *The pusher arms we needed to change parameter so they don't close as tight for a smooth transfer.*
- *Temperature was reduce to 180degrees with short sealing time, this was to try reduce the amount of pressure on the tray edges.*

- *Compensation was changed a few times to try get a better tack down and peel affect.*
- *I found the thicker trays 550um worked better than the 500um and would recommend the thicker the tray the better it tucks around product and holds form.*
- *500um did work but this will limit the scope with different top layer film which needs to run hot between 180 to 200 degrees.*
- *The trays seal better without the silicon and with 10mm to 13mm you won't need the silicon to denest trays.*

**Wednesday 19th**

- *Created a new recipe for Plantec 11x9 pre-made trays*
- *Inspect the machine cycle with new trays and looked okay.*
- *Changed a few setting to make some improvement*
- *The 11x9 trays held its form and ran well through the machine, I believe the 11x9 is 550um in thickness which is why it ran well.*
