Platformer	A17A-11614	Line 4

Equipment condition:

Work Performed:

Tuesday 19th

Called in for start-up on new Cryovac film and setting up recipes on 9x8 DOT
The production trial run was with the help of David Villa from Sealed air.

- *We need to set-up a recipe to run the new XT500 Cryovac film which runs at a low temperature.*
- *The diffuser temperature was set at 130 degrees and saved over the Mono small recipe.*
- *We did have problems with the top layer of film peeling off due to damaged diffusers but after running at a low temperature we manage to run well.*

- *The diffusers had to be fully clean off contamination from the previous film and once we cleaned the diffusers we ran well.*
- *The Trave recipe needed to be cleaned up as well to run this new film which ran well.*
- *The product size was a good size for the 9x8*
- *Follow production all morning with a 3 % reject for the time while on site.*
