GENERAL SERVICE REPORT

Customer:	Coles ROAA	**Date:**	20th March
Site Address:	54 Templar Rd, Erskine Park NSW 2759	**Site Contact:**	Alan Villa
		Phone:	0438 325 453
Customer PO #:		**Internal Job #:**	4440

Subject: 11x9 tool Skin

Equipment Type:	Serial Number:	Customer Line # (if applicable):
Trave 590	A17A-11614	Line 4
Platformer	A17A-11614	Line 4

Equipment condition:

Work Performed:

Wednesday 20th

- *Arrived on site to inspect the performance of the 11x9 skin tool due to the deforming to trays*
- *The trays are deforming on the edges after sealing the product.*
- *I made some changes to the Platformer so the edges are more even to see if this would improve*
- *I ran empty trays without product to see what affect the film does to trays and if it still deforms.*
- *Temperature on Trave 590 is 185C which is normal*
- *Temperature on Platformer is 115C diffuser and 100C P&P which is low.*
- *End result is the thickness of the bottom web 500um which is then affect by top tool temperature of 185C and top TH300 being 150um causing the deforming when the top film pulls-in after forming.*
- *I don't believe this problem is a machine issue but more of a material thickness.*
