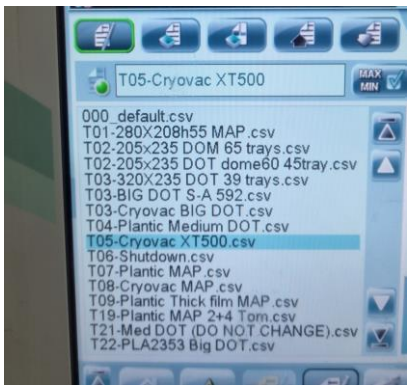
Platformer (bottom layer)

Mono film XT500 installed for the trials on large trays, which was a success and formed well. A new recipe was set-up and saved as Mono XT500.



Please note we have set-up a recipe for the trials only but will need to be fully tested and fine tune once the film is approved and ready for full production.

Trave 590 (top layer)

The Mono film installed and set-up for the trails only, please note the recipe was only set-up in a few minutes just to run and test some product through.

Once the film is approved, we would need to fully set-up the recipe which will take half a day for correct recipe and we would need the upgrade on temperature control for shuttles.
