GENERAL SERVICE REPORT

Customer:	Coles ROAA	**Date:**	23rd January
Site Address:	54 Templar Rd, Erskine Park NSW 2759	**Site Contact:**	Alan Villa
		Phone:	0410 556 153
Customer PO #:		**Internal Job #:**	4264

Subject: XT500 film trial Platformer

Equipment Type:	Serial Number:	Customer Line # (if applicable):
Trave 590	A17A-11614	Line 4
Platformer	A17A-11614	Line 4

Equipment condition:

Work Performed:

Tuesday 23rd

- *Called in to help support 9x8 trays with XT500L bottom web on Platformer.*
- *A new recipe was created for the Cryovac XT500 bottom web on Platformer.*
- *We tried to run the XT500 film at 135C to prevent the film barrier been affect by heat same as 11x9.*
- *This was not successful at 135C but had to run at 140C plus to soften the film preventing from slipping off the diffusers.*
- *At 140C we achieve a good formed tray except we can see the barrier has been affected.*
- *On the Trave 590 a new recipe was created to work with XT500 film.*
- *They were getting some rejects but this was more to do with the way the product is been pack (too much product for tray size).*
- *The tack down between top and bottom layer is not the best but seems to work and will need to be monitored over time.*

Note: *This film is not fully recommend as we can't achieve a lower temperature without affecting the film barrier and moving forward we need to add the extra diffuser to see if we able to run at a lower temp.*
