Subject: Tool locking fault

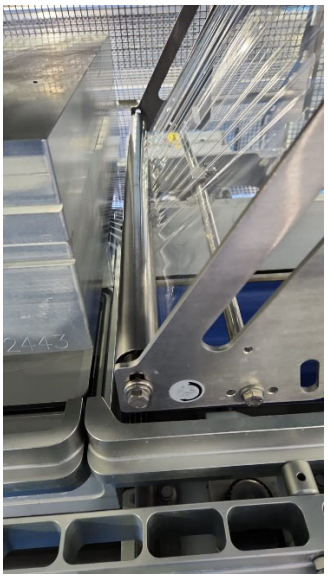
Equipment Type:	**Serial Number:**	**Customer Line # (if applicable):**
Trave 590 XL	A/21/A-12629	Line 2
Equipment condition:	Good	

Work Performed:

Travelled to site for tool Lock Issue

On arrival line was running normaly maintenecne reported there dificulty in opening the tool from cleaning. They eventualy opened tool and relocked the tool by adjusting the sensor position.

I attempted to unlock and lock the tool it took several attemps. I checked tool location and reseated tool correctly and this fixed the issue. as I believe the tool became dislodged when the tool jammed bending the roller and support, then when tool was taken out of cleanning it moved and caused sensor issue. This is the trid time I have seen that the tool has jammed several times since the tlast major jam and we only replaced the posts it would be a good idea to replace the posts and guides to complete a proper lift system service.



Other wisetool locked correctly on change over . I will quote all required parts and send through.
