GENERAL SERVICE REPORT

Customer:	Coles ROAA	**Date:**	28 Sep
Site Address:	54 Templar Rd, Erskine Park NSW 2759	**Site Contact:**	Trent Cleminson
		Phone:	0438 287 226
Customer PO #:		**Internal Job #:**	1349

Subject: New film trial

Equipment Type:	Serial Number:	Customer Line # (if applicable):
Trave 590	A17A-11614	Line 4
Platformer	A17A-11614	Line 4

Equipment condition:

Mondini Platformer film trials

Work Performed:

Ran some film trials through the Mondini Platformer on large trays and medium trays.

Recipe used: PLA2353 Big DOT

- *We battled to achieve a good result, which is the same as before where the trays would hang off the pre-heater after the mould and cause a crash when the second pick & place moves into position.*
- *We found with the pre-heater set at 140 + degrees would activate the film and bond to the pre-heaters, looking at the pre-heaters we found film strips melted on the edges which is concerning as this will cause contamination of plates which will end up preventing heating up the film for moulding or block vacuum ports.*
- *We tried to reduce the pre-heater temperature to 135 degrees and below which causes the film to fall off the pre-heater plate during it turning cycle.*

Recipe used: PLA2353 Medium DOT

- *Installed the medium tooling to test run the same film as above.*
- *Increased the pre-heater temperature 135 degrees to 145 degrees to stop the film from dropping off the pre-heaters during it turning cycle.*
- *The film worked okay with no hang-ups and was forming trays okay, the only concern is the same as above with melted film on the edges on pre-heaters.*

We not 100% sure why the film would hang-up on Large but not medium unless the pre-heaters on the large need to be fully cleaned and free of any contamiantion as we did notice the plates were sticky.
