Subject: Mono film trial

Equipment Type:	Serial Number:	Customer Line # (if applicable):
Trave 590 DOT		
Platformer		

Equipment condition:

Work Performed:

Arrived onsite for trial
Installed the platform mono film and 590 film

Tool install was large tray DOT
Had issue with sealing and popping film tried to iron out with perimeters but the main issue was product placement and asking too much of the film to get into hard cavities
When product is place correctly on the tray product seals with no issue
The cuts of meat are too large for tray and meat is right up agaist the seal lip of the tray
For good pack mondini requires 15 to 20mm clearance between product and seal lip
Please see below picture I know its for a 1400 trave but the princble is still the same across all skin machines
