GENERAL SERVICE REPORT

Customer:	Hilton Food Australia	**Date:**	03/19/2025
Site Address:	22 Seeana place Heathwood QLD 4110	**Site Contact:**	Niyomy Rasanayagam
		Phone:	0425400020
Customer PO #:		**Internal Job #:**	5676

Subject: Line 14-16-18 infeed fine tunning

Equipment Type:	Serial Number:	Customer Line # (if applicable):
Trave 590 XL	A18A-11947	Line 18

Equipment condition:

Work Performed:

- Attended onsite to review the feeding of the Mondini machines on lines 14, 16, and 18, with today's focus on **line 18.**
- During discussions with production, it became clear that the main objective was to **increase line speed**.
- For line 18, the client's target speed is **116 packs per minute (ppm).**
- After several adjustments, we achieved stable operation at **114 ppm**, though a few issues need to be addressed to ensure consistency and reliability.

Key Issues Identified:
1. The portioning mince belt is drifting left and right.
2. The stopper on the infeed belt is not secured, and the guides are unstable during movement.
3. The feeding sensor requires inspection to ensure consistent readings.
4. The tray belts on the mince lines need replacement.

General Observations:
- The full line has not received proper servicing for several years.
- When attempting to run at maximum speed, small maintenance deficiencies significantly affect overall performance.

Next Steps:
- Despite the issues, we managed to maintain 114 ppm for a period today.
- Tomorrow, we will continue focusing on **fine-tuning line 18** to further improve performance.
