**Subject**: Line 2 – Supporting SealedAir with the issue on VST 211 film

| Equipment Type: | Serial Number: | Customer Line # (if applicable): |

**Equipment condition:**

**Work Performed:**

- Visited the site to test 32 rolls of VST211 film recently delivered
- Upon arrival, we first had to resolve a shuttle issue caused by an onsite swap between the Line 6 and Line 2 shuttles.
- Once the correct shuttle was reinstalled, we began testing different film batches.
- The process involved installing each film roll—without adjusting any machine settings (recipe T06 – PAPER D35 HEA1429 VST211)—and checking whether trays were sticking to the top tool.
- Unfortunately, a significant number of film rolls showed the problem
- Sealed Air was able to identify some possible similarities among the rolls that presented issues.
- Additional tests were carried out to compare sealing strength across different paper tray suppliers
