Subject: multivac film trial on platformer

Equipment Type:	Serial Number:	Customer Line # (if applicable):

Equipment condition:

Work Performed:

Arrived onsite for trial
Installed multivac film on to platformer
With the original recipe Mono trays were not good
Film was getting stuck on the upper tool heater plate and didn't transfer to lower tool or form, then would double up on the next cycle this temp was 125 degrees

Fine tune a lot of setting just to get the film to form

GENERAL SERVICE REPORT

After forming the pick and unload was not dropping all trays and leaving on the shuttle

Had to fine tune the seal lip forming to get the trays to release
Tried reducing temp but this would compromise forming
With enough trays formed for testing trave 590
Installed top film on trave and found reel diameter was too large and won't fit onto reel
Reduced diameter by removing film off core
Installed film on trave
Started to run film cycle and found the film doesn't like to sit and starts to curl up which fails to transfer to tool
When film didn't curl up the form was a struggle tried a difference range of temps on shuttle and tool

Film placement on seal bar was good but as soon as vacuum is applied the film would pop
Ran cycle without 2nd valve the slowest forming possible still popped
This film is not suitable for DOT
